User Data Privacy

PII Storage

[Customize](#)[Preview](#)

De-identify and limit or do not collect sensitive user data

Informed Consent

[Customize](#)[Preview](#)

Let users actively choose to give consent for clear, specific data collection, as well as opting out

Access and Erasure

[Customize](#)[Preview](#)

Let users see their stored data, delete their data, and have the 'right to be forgotten'

Data Portability

[Customize](#)[Preview](#)

Let users export their data in a machine-readable format

Rectification

[Customize](#)[Preview](#)

Let users supply corrections to their data

Basic terminal usage

Introduction to Bash 1

[Customize](#)[Preview](#)

Shell commands to navigate around directories and modify files.

Introduction to Bash 2

[Customize](#)[Preview](#)

Navigate files and folders more efficiently, and search for file contents.

Introduction to Bash 3

[Customize](#)[Preview](#)

Preview the contents of files; create new folders and move files around.

Intermediate terminal usage

Encrypting, encoding and hashing

[Customize](#)[Preview](#)

Common encoding patterns, cryptographic techniques, and command line tools.

Nano for text editing

[Customize](#)[Preview](#)

Use Nano, a basic text editor, for creating and editing files.

Introduction to bash scripting

[Customize](#)[Preview](#)

Automate tasks by writing and running basic scripts in bash.

CWE-601 #22: Open Redirects

The Art of Redirection

[Customize](#)[Preview](#)

URL redirects cause users to automatically visit untrusted sites.

No Going Back Challenge

[Customize](#)[Preview](#)

Make your way around a URL redirect safety check.

Integer Overflows

Short Scores

[Customize](#)[Preview](#)

A program to add golf scores is susceptible to overflowing.
